

▶ WHAT IS PRECOM 4

Intelligent Mobility Solutions for your workforce

Latest generation of PreCom Mobility Solutions

PreCom is a leading mobile software solution for enterprise companies operating large mobile workforces. The mobility platform is optimized to support the mission-critical mobile work procedures, vast user bases and service levels that characterize businesses in the transport & logistics, field services and security industries.

PreCom 4

PreCom 4, is the latest generation of PreCom. It's an evolution from PreCom 3 – a platform generation now more than 10 years old. Those familiar with PreCom will recognize a lot in PreCom 4 we still have the role based, three layered architecture and the platform allows for both configuration and native development of customer.

PreCom Logistics leads the way

PreCom logistics is the first vertical solution to be released on PreCom 4. It's a product to meet the requirements from large postal and logistics customers with extensive standard functionality available out of the box – but based on a development platform to enable customer specific features and integrations to all types of back end systems.

What about PreCom 3?

Existing customer solutions on PreCom 3 will be continuously supported. There is no end date for PreCom 3.

MAJOR NEWS IN PRECOM 4

Logistics

PreCom Logistics introduces a set of new functionality suitable for logistics- and postal organizations:

- ▶ Web platform to manage the entire end to end logistics flow, create jobs and routes, dispatch and follow up on events, deviations and proof of deliveries. This includes

- ▶ Highly configurable workflows enabling swift implementation of new services and support for specific workflows.
- ▶ Navigation with route optimization and ETA.
- ▶ End customer notifications.
- ▶ Improved support for routes with multiple deliveries and collections at the same stop.
- ▶ Full support for containerization.

PreCom Tools

With PreCom 4 we introduce an improved set of end user facing web based tools such as:

- ▶ PreCom Web Map - for real time and historical tracking of users and resources.
- ▶ PreCom Administration and Configuration - administrate and configure the system from the web.
- ▶ PreCom BI and Reporting – see system status on real-time dashboards and get your own specific reports direct from the system.

New Platform features

The new platform is modernized with both new technologies and new functionality;

- ▶ Updated communication, moving from Self hosted to ASP NET Web API in IIS.
- ▶ Support for all http-verbs.
- ▶ New web platform based, moving from Silverlight to Angular.
- ▶ User management standardized in AD-LDS.
- ▶ Technical improvements: Dependency injection using Dagger and Tiny IOC, Dynamic forms rendered using native controls and Improved Scale out and database optimization.

ABOUT PRECOM

- ▶ PreCom in operation in over 25 countries
- ▶ Purpose designed for Transport & Logistics, Field Service and Security
- ▶ Comprehensive functionality combined with configuration and extension capability
- ▶ Proven for large and business-critical enterprise mobility solutions
- ▶ Integrate with multiple ERP or backend system

ABOUT POCKETMOBILE

PocketMobile is Europe's leading supplier of mobility solutions for companies with field personnel. Our target groups are companies active within postal services & logistics, security & surveillance, and field services.

Our solution, PreCom, is a scalable mobility platform that is optimized to fit our customer's business procedures, but still based on a standard system. PreCom was built for complex, business-critical procedures with high requirements for adaptability, usability and integration with a variety of ERP and support systems. Every day, we provide a large number of businesses and over 100,000 users with a powerful mobile tool that simplifies work procedures, reduces administration and boosts productivity.

Our reference customers include global companies such as Schenker, G4S, DHL, Polygon, DSB, DSV and EITel. Founded in 2000, PocketMobile has its head office in Stockholm, Sweden, a development center in Sri Lanka, and an international network of implementation partners.
